

MBB B4

Six Sigma for Transactional Processes

Who Should Attend:

- Managers and analysts seeking to apply Six Sigma methodology to improve business processes
- Mentors of Black Belts and Green Belts

Key Topics:

Simulation techniques, Modeling business processes prior to change, Process redesign, Modeling business processes following change, Logistic regression analysis, Measurement system analysis for attribute variables, Design of experiments for attribute response variables, Control charts for attribute response variables, Data mining

Benefits:

- Insight into the Six Sigma Process Improvement Methodology™
- Practice in simulation methods using iGrafx as applied to the Improve phase of the Process Improvement Methodology™
- Knowledge of logistic regression analysis for business processes
- Understanding of data analysis techniques for analyzing attribute response data

Prerequisites:

- Six Sigma Black Belt level training or equivalent
